

M 7.5, NEW BRITAIN REGION, PAPUA NEW GUINEA Origin Time: Tue 2015-05-05 01:44:05 UTC (11:44:05 local) Location: 5.46°S 151.89°E Depth: 42 km

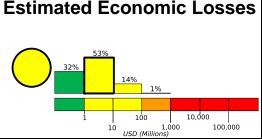

PAGER Version 3

Created: 2 hours, 4 minutes after earthquake

Yellow alert for shaking-related fatalities and economic losses. Some casualties and damage are possible and the impact should be relatively localized. Past yellow alerts have required a local or regional level response.

Estimated economic losses are less than 1% of GDP of Papua New Guinea.

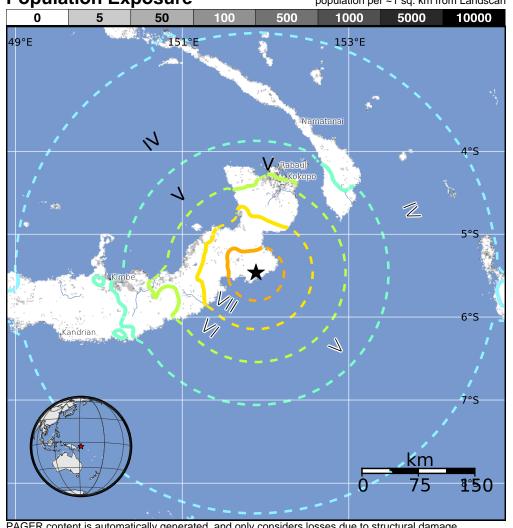

Estimated Population Exposed to Earthquake Shaking

	POPULATION (k = x1000)	*	9k*	318k	192k	131k	18k	12k	0	0
ESTIMATED MODIFIED MERCALLI INTENSITY			11-111	IV	V	VI	VII	VIII	IX	X+
PERCEIVED SHAKING		Not felt	Weak	Light	Moderate	Strong	Very Strong	Severe	Violent	Extreme
POTENTIAL	Resistant Structures	none	none	none	V. Light	Light	Moderate	Moderate/Heavy	Heavy	V. Heavy
DAMAGE	Vulnerable Structures	none	none	none	Light	Moderate	Moderate/Heavy	Heavy	V. Heavy	V. Heavy

*Estimated exposure only includes population within the map area.

Population Exposure

population per ~1 sq. km from Landscan

Structures:

Overall, the population in this region resides in structures that are vulnerable to

earthquake shaking, though some resistant structures exist. The predominant vulnerable building types are unreinforced brick masonry and informal (metal, timber, GI etc.) construction.

Historical Earthquakes (with MMI levels):

Date	Dist.	Mag.	Max	Shaking
(UTC)	(km)		MMI(#)	Deaths
2002-01-13	90	6.3	VII(22k)	0
1985-05-10	95	7.2	VII(28k)	1
1983-12-21	7	6.2	VII(5k)	10

Recent earthquakes in this area have caused secondary hazards such as tsunamis and landslides that might have contributed to losses.

Selected City Exposure

from GeoNames.org

	Ū	
MM	l City	Population
V	Kokopo	26k
V	Rabaul	8k
IV	Namatanai	1k
IV	Kimbe	19k
IV	Kandrian	1k
IV	Kavieng	14k

bold cities appear on map

(k = x1000)

Event ID: us20002bnf

PAGER content is automatically generated, and only considers losses due to structural damage. Limitations of input data, shaking estimates, and loss models may add uncertainty. http://earthquake.usgs.gov/pager
